

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): A method of providing an electronic program magazine through a medium, which is able to receive television signals and access the Internet, the method comprising:

checking electronic program guides and search engine tables contained in broadcast signals received from at least one broadcasting company and composing a total electronic program guide and search engine table;

setting a keyword, the setting of the keyword comprising selecting a name of a program as the keyword; and

executing a default search engine and displaying search results obtained by the default search engine using the keyword,

wherein the search results are a plurality of hyperlinked web pages.

2. (original): The method of claim 1, wherein each of the search engine tables is a list of a plurality of search engines which each of the broadcasting companies selects among existing search engines.

3. (original): The method of claim 2, wherein the search engines included in the search engine table are input from a user and registered to a search engine list.

4. (currently amended): The method of claim 1, wherein ~~the~~ search engines included in the search engine table are input from a user and registered to a search engine list.

5. (currently amended): The method of claim 1, wherein the setting of the keyword comprises receiving the keyword from a user ~~if~~ when a program is not being broadcasted and the electronic program guide is not executed.

6. (original): The method of claim 1, wherein the medium enables a user to access the hyperlinked web pages according to the user's selection.

7. (currently amended): The method of claim 1, wherein the medium displays all ~~of the~~ search engines shown in the search engine tables in addition to a web page of the search results.

8. (currently amended): The method of claim 7, wherein ~~if~~ when another search engine is selected among the search engine list, search results obtained by the selected search engine using the keyword are displayed.

9. (original): The method of claim 1, wherein the setting of the keyword comprises selecting a name of a program that is being broadcasted through the medium or that is selected in an electronic program guide, which is being executed, as the keyword.

10. (original): The method of claim 1, wherein the medium comprises a digital television receiving advanced television systems committee (ATSC) signal and having access to the Internet.

11. (original): The method of claim 1, wherein the checking comprises checking electronic program guides and search engine tables contained in broadcast signals received from each of a plurality of broadcasting companies.

12. (original): The method of claim 1, further comprising judging if an electronic magazine program function is called by a user, wherein the checking is performed only if the electronic magazine function is called.

13. (original): The method of claim 1, wherein composing the total electronic program guide and search engine table comprises:

separating electronic program guides and search engine tables from the received broadcast signals;

removing duplicative search engines from the separated search engine tables; and

including the separated electronic program guides and search engines, which were not removed, in the total electronic program guide and search engine table.

14. (original): The method of claim 1, wherein the default search engine is set by the medium.

15. (original): The method of claim 1, wherein the default engine is set by a user.
